- VI. Thunder Mountain
- VII. Meet the team!

# OUR STORY

From Humble beginnings in a small south easterly town in the United kingdom, a young fashion designer embarked on his quest to break into the industry of clothing and fabric manufacture. His quest took him all over the world, discovering new textures, fabrics, hybrid materials and new methods in manufacture.

Mo was is his name. From here, Mo, decided to split paths and go alone in the hunt for success, breaking away from his employer. Sadly, like many young talented individuals, they are forgotten and lost in this world of disapproval and seeming normality. This is where Mo needed Fel and Fel needed Mo. But where will they end up?

Mo and Fel can be considered as family, they have always had each others backs and have both tried to help each other in this struggling world. This is where Mo gave everything up to help Fel pursue his ambition of experimentation and science.

Fel, much alike to Mo, studied at a top 5 university in the UK. His discipline was **pure Chemistry**. During his time, he learnt that all was not as it first seemed. After many years between jobs and struggling to make an impact, he turned to #NewAgeEnergy sources. Here he discovered blockchain technology.

# OUR STORY

In his search for satisfaction, Fel re-contacted Mo and a plan was hatched. What a better way to make an impact than blending two polar-opposite, diverse and interesting subjects, than design and chemistry. As such FELMO Labs was Born in 2022. Fel Bringing 8 years of chemical wizardry and Mo bringing 35 years fashion experience. From here, the Logo was re-imagined.

# OUR AIMS

What do you want to expect?, this collection aims to bring a fun, relaxed and enjoyable environment, that exhibits different styles of art all in one place. So, what exactly are you getting? You will be getting nearly 50 years of combined mastery in two varying professions. You will also be getting a piece of history. The original drawings were completed nearly 30 years ago. These will be included as a special edition, more on this later. The collection is purely art, no “tokenomics” will be brought out at this stage. This is due to oversaturation and the fact that we believe purely in the native token with which you will mint the Lightning bones with.

Now is the time because most collections are created with the aim to raise capital and then close. This collection will only impress and improve on its aims. This is because we are starting with art only in mind. We also believe that we are in the perfect position to launch with our team.

# ARTWORK

# ARTWORK

The Art is not like the typical NFT's that have taken the communities by storm. There are no Pixelations, no  $\frac{3}{4}$  body portraits. Our collection is dominated by the Electric skeleton Logo. This is synonymous with our brand identity and will be used throughout the entirety of the collection.

The brand identity is simple! A friendly, relatable character that evokes happiness, joy and laughter. The Electric Skeleton is a symbol of eternity and resurrection. There will be 3 traits only in this collection.

You may ask, how will we achieve variety and uniqueness in a 10,000 strong collection?

It is exactly this low trait count that is becoming the very vehicle for us to do this. With nearly 200 individual traits, that have been meticulously thought and created, The Bone Lightning Bunch will not lack personality, style or character. Everything has been hand drawn and pieced carefully. We feel like it is about time that the NFT art world believed and participated in something completely different.

The Traits comprise a Character, the skeleton, and a location/background.

The Character is the mask, whilst being another identifying feature to the skeleton. This allows the art to have a completely unique look whilst still sharing its traits.

The characters are not only for aesthetics, but they also each have a tailor-made story and symbolize thoughts and feelings that we experience in our day-to-day lives.

All will be revealed once the mint is in motion.

# PURPOSE

The art's purpose is to be visually appealing, have hidden secrets and story's that will reveal over time. The art will also function as an exclusive pass into The Bone Lightning Bunch's Casa di Moda. Here, you will be able to vote on the upcoming merchandise plans and designs. These will then be manufactured and produced for sale.

This will be aimed to be fully functional on The Warehouse, on our web-page. We aim for this to be an interactive experience than allows full immersion for the holders.

# THUNDER MOUNTAIN

### Stage 1: Entry through the portal

Entry through the portal is a prerequisite to joining Bone Lightning Bunch. Verino oversees who enters and who doesn't, but when he's sleeping it's in your hands.

### Stage 2: Resurrection

Now you have entered our world, it's time to go where it all began, Mo's grave. So far to travel up, only to come back down!

### Stage 3: Gathering materials

Now you know what must be done, materials are required to successfully re-incarnate Mo. Verino and Fel can help here, they have good reach and strong set-ups.

### Stage 4: Production and manufacture

Production shall commence, as will manufacture. This will happen once our prototype has been cleared safe for use. Verino will be vital to have on our side here.

### Stage 5: Modelling and sale approval

Once clearance is approved, modelling and an online business will hopefully grow into a boutique. This will be some years from now, but the space craft may help here?

### Stage 6: Lightning Boutique

Lightning speed into the future, we see gravity waves, nuclear powered cars, and virtual food. We also see Bone lightning Bunch's clothing empire both virtual but also physical. What are those fragrant wafts from the valley?

### Stage 7: Deep Mining

Fel has reunited with Mo, Verino is hibernating again, or is he? How deep were his pockets? The question lies in the depths of the mountain, Thunder!

### Stage ∞: Aromatics?

Perfumed water?, harsh chemicals?, I don't think so, said Verino. Part of his stash encompassed alien fuel that had such an infectious scent that these copiously clean fragrances had to be capitalized on. Fel puts his skills to work.

# SQUADRA

Mo

Mo is Fel's closest friend and family relative. Through their cataclysmic electrical pulse, we get perfect synergy. This is shown in the art, it's story, origins and more importantly the design and execution of this whole experience.

Fel

Fel is second in line to the throne, he may hold the crown and the chemistry behind its construction, though he is still a kid. He is the prince of power and wealth in all but the deflationary paper money. A strong advocate of decentralization and harmonious living. He and Mo are tied irreversibly.

Verino

Verino is the mysterious character, he is considered a lucky charm. He is always present but never to be seen. He has beavered many riches away and is in eternal hibernation. Without Verino, the electricity of the Bone lightning Bunch would still be a concept. He holds many keys, but how many will we see him use?
